

Severstal North America Begins Recruiting for its Summer Internship Program

DEARBORN, Mich. March 1, 2012 – Severstal North America, a subsidiary of OAO Severstal, an international steel and mining company, is pleased to announce the start of recruitment for its popular summer internship program at its locations in Dearborn, Mich. and Columbus, Miss. With paid internships offered in engineering, computer science, accounting and finance, safety, marketing, supply chain management, communications and human resources, the company is looking forward to attracting many qualified applicants.

Mel Baggett, Vice President, Human Resources, said of the program, “I believe that a successful internship program benefits both the interns and the company. The intern gains valuable insight into the international steel industry as a possible career path through first-hand experience, while the company is provided with a pipeline of future talent.”

The program is designed to give students meaningful, real-world experience, with each intern assigned to a mentor to help develop and enrich their time with Severstal.

To learn more about the program, eligibility requirements, or how to apply, please visit Severstal North America on LinkedIn <http://www.linkedin.com/company/severstal-na/careers> or send an email to employment@severstalna.com.

About Severstal North America:

Severstal North America is a major steelmaker in the United States and specializes in the full range of the high quality light flat rolled products. Corporate headquarters and integrated operations are located in Dearborn, Michigan. A new state-of-the-art electric arc furnace operation in Columbus, Mississippi serves the growing demand for steel in the southeastern United States. Severstal North America also has several joint ventures for the high quality, value-added coated products, as well as a jointly owned coke-making facility Mountain State Carbon. Severstal North America is a wholly-owned subsidiary of OAO Severstal, one of the world’s largest vertically integrated steel and mining companies.
