Steel Joist Institute Webinar On Using the SJI Virtual Joist and Joist Girders in RAM

FLORENCE, SC. – The Steel Joist Institute will present a webinar on Wednesday, May 18, 2016, titled “Using the SJI Virtual Joist and Joist Girders in RAM.” The webinar will demonstrate how to specify Open Web Steel Joist and Joist Girders for structural applications within RAM software.

There are several learning objectives that this webinar will review including explaining what Open Web Steel Virtual Joist and Joist Girders are and how the tables were developed. The webinar will then demonstrate and explain how to specify Open Web Joist and Joist Girders within the software. Additionally, a demonstration and explanation on how to specify loads to Joists and Joist Girders within the software will also be included in the key webinar takeaways. Finally, participants will receive a general explanation and tips on how to operate the software in the most effective manner.

The webinar will be presented from 11:00 a.m. to 12:00 p.m. (EDT). Individual and site registration for the webinar is now available online at <https://steeljoist.org/maywebinar>. Individual registration cost is \$35 and each person who registers will receive his or her own link to the webinar and earn 0.10 CEUs or 1.0 PDHs. Site registration also is available for \$140, allowing multiple attendees from the same company to utilize one link to the webinar.

Besides setting standards for the steel joist industry, the Steel Joist Institute works closely with major building code bodies throughout the country helping to develop code regulations regarding steel joists and Joist Girders. The Institute also invests thousands of dollars in research related to steel joists and Joist Girders and offers a complete library of publications and other training and research aids. The Steel Joist Institute is a not-for-profit organization. For more information, visit www.steeljoist.org or join the [Steel Joist LinkedIn](#) group.
